- PIEZĪMES:
- Doto lapu skaitļi kopā ar lapām BK-1, BK-5,
  - Visas koka konstrukcijas obligāti nepieciešams apstrādāt ar antiseptiķi "INWOOD Classic" un antipirēnu "INWOOD Fire" (vai analogiem);
  - Visus koka konstrukciju savienojuma mezglus veidot pēc iespējas tuvāk balstījuma vietai;
  - Savienojumu veidot naglojot vai saskrūvējot.
  - Stiprinot leņķa savienotājus ievērot minimālos naglu attālumus:
    - \* starp asīm garen - un šķērsvirzienos - 20mm;
    - \* no naglas ass līdz dēļa galam - 40mm;
    - \* no naglas ass līdz dēļa malai: - 28mm;
  - Materiālu specifikācijā nav ievērtēti materiālu savienoju pārāidumu veidošanas apjoms.
